DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 17, lines 2 and 3, the phrase "relate to some character or animal" is considered to be vague and indefinite.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Klingler.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klingler in view of Fohrman.

Klingler discloses the apparatus substantially as claimed. However, Klingler does not disclose the rotatable dispensing disk. Fohrman teaches, in the analogous field of comminution, a rotatable dispensing disk [Fig. 1, "10"] for the purpose of dispensing comminuted material from the housing.

It would have been obvious to one having skill in the art at the time the invention was made to modify Klingler with a rotatable dispensing disk in order to dispense comminuted material from the housing as taught by Fohrman.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eyrick et al, Weese, Barker and Middleton are all being cited for showing similar comminuting mechanisms to that of the applicant.
